

Biotechnology Courses!

Gain skills to work in Biomanufacturing and Pharmaceutical Companies

Biotech 100

Foundations of
Laboratory Science

Biotech 101

Biological Molecules
Proteins and Nucleic acids

Biotech 103

Chromatography and
Biomanufacturing

Three 5-week courses

5 days/week

Night and Weekend classes

Complete ALL 3 in a single
semester!

These courses provide the foundational skills for any student to find employment in the biotechnology sector. Lecture and Laboratory sessions will cover industry standard protocols. These include biomanufacturing operations, media preparation, product purification, aseptic technique, and project management.
