POLITICAL SCIENCE

Date: 08/24/2017

## Social Sciences

### POLITICAL SCIENCE

#### CLO

#### POL SCI001 - THE GOVERNMENT OF THE UNITED STATES

- Use objective and subjective analysis to evaluate the significance of a political issue, event, trend, or development.
- Assess their participation in civic engagement (service learning, collective action, or individual action), sharing their experience with classmates.

#### POL SCI002 - MODERN WORLD GOVERNMENTS

- Evaluate and analyze the institutions, processes and values that shape politics within and among nations and states and be able to apply that knowledge to the world.
- Analyze the major theories, concepts, foundations, and methodologies used in the study of comparative politics. Students explore the complex interrelationships between political, economic, social, cultural, and historical forces.

#### POL SCI005 - THE HISTORY OF WESTERN POLITICAL THOUGHT

- Analyze and evaluate major traditions of western political theory and their critics from Greece through the modern era.
- Assess and analyze the theoretical foundations of enduring political questions including the role of the state, the obligation of citizens/subjects to the state and vice versa, basic values that should be pursued, and to what end, and by what means those values should be pursued.

#### POL SCI007 - CONTEMPORARY WORLD AFFAIRS

- Analyze and apply International Relations concepts and theories to specific case examples.
- Evaluate the actors (states, international organizations, non-governmental organizations, and other global actors) participating in world affairs and assess their overall effect on global politics.

#### POL SCI019 - WOMEN IN POLITICS

- Evaluate women's representation and participation in American politics and the electoral process.
- Analyze the evolution over time of women's roles and gender dynamics in the political sphere.

#### POL SCI050 - INTRODUCTION TO RESEARCH IN POLITICAL SCIENCE

- Create an empirically grounded and theoretically based research project based on credible information, primary and secondary sources, and clear logical prose
- Create an empirically grounded and theoretically based research project based on credible information, primary and secondary sources, and clear logical prose.
- Demonstrate knowledge and understanding of major methods of political inquiry including research design, data collection, empiricism, statistical analysis, qualitative analysis, computer applications, hypothesis testing, structured observation, and textual analysis.
