CITING SOURCES WITHIN YOUR PAPER

The following guidelines and examples are based on the 16th edition of the *Chicago Manual of Style* (R 808.027 C432m16) and the 8th edition of Kate Turabian's *A Manual for Writers of Term Papers, Theses, and Dissertations* (R 808.027 T84m8). If you have questions about how to cite sources other than those illustrated in this study aid, consult the manuals listed above.

The *Chicago/Turabian Style* presents two basic documentation systems:

1. Note system (footnotes and bibliography).
2. Author-date system (in-text citations matched by reference list entries).

This study aid reflects the **note system** which is commonly identified with the *Chicago/Turabian Style*.

Here are some basic rules:

- To acknowledge a source in your paper, place an arabic numeral typed slightly above the line (superscript). Note numbers must follow one another in numerical order, beginning with 1.
- Place the note at the foot of the page. Separate the text from the footnotes with a short rule or separator (about 1.5 inches long).
- Single spacing is used within footnotes, with double spacing between notes.
- First line of a note should be indented five spaces from the left margin.
- The first time a work is mentioned in a note, the entry should be in complete form. Once a work has been cited in full, subsequent references to it should be in shortened form (see examples below).
- When references to the same work follow one another with no intervening references, **ibid.** may take the place of the author's name, title of the work and any succeeding material that is identical. (**Ibid.** is an abbreviation of the Latin word *ibidem*, "in the same place").
- Refer to the page(s) by number at the end of the note.
