Biology

BIOLOGY 003- Introduction to Biology (UC/CSU) - 4 Units

Requirement Designation: Meets Cal-GETC-5B or 5C

2025 Fall SCHEDULE

Los Angeles Mission College

This course for non-majors examines the fundamental principles of biology with laboratories emphasizing hands-on investigations. Topics include an introduction to evolutionary theory, basic biological chemistry, cell function and reproduction, cellular respiration and photosynthesis, classical and contemporary genetics, gene expression and an introduction to animal structure and function. Meets UC/CSU GE requirement of natural science with a lab.

Enrollment Requirement: Prerequisites: BIOTECH 002 and BIOTECH 003

This course provides an introduction to techniques for culturing cells, including media preparation, sterile technique, freezing, thawing, subculturing, and maintaining cells. Theory includes the selection of media, maintaining sterile conditions, and preventing contamination. Practical experience includes the proper use and care of equipment for culturing cells. Stem cell technology is also examined.

BIOTECH 320- Design of Experiments for Biomanufacturing (CSU) - 4 Units

This course teaches formalized design of experiments (DOE), a system that optimizes a process through the methodical varying of key parameters and a formalized approach to analyzing, interpreting, and applying the results. DOE is designed to make any process more robust and minimize variability from external sources. The course builds upon the statistical concepts required for DOE, including hypothesis testing, confidence intervals, statistical models, and analysis of variance (ANOVA). The DOE approach systematically varies the parameters of a biomanufacturing process to improve its operation. This course is open only to students enrolled in the biomanufacturing bachelor's degree program.

Business

BUS 001- Introduction To Business (UC/CSU) - 3 Units

Students engage in a multidisciplinary examination of how culture, society, economic systems, legal, international, political, financial institutions, and human behavior interact to affect a business organization's policy and practices within the U.S. and a global society. The course demonstrates how these influences impact the primary areas of business including: organizational structure and design, leadership, human resource management, risk management and insurance, organized labor practices, ethics and social responsibility, marketing, organizational communication, e-business/technology, entrepreneurship, legal, accounting, and financial practices, and the stock and securities market; and therefore how they affect a business's ability to achieve its organizational goals.

Chemistry

CHEM 051- Fundamentals Of Chemistry I (UC/CSU) - 5 Units

Requirement Designation: Meets Cal-GETC-5A or 5C

Chemistry 51 is a descriptive course in general, organic and biological chemistry designed for nursing and Allied Health students. Topics include: the metric system of measurements, chemical symbols, formulas and nomenclature systems, chemical equations and physical and chemical characteristics for all states of matter. Other topics include acids, bases, buffers and pH. Organic topics focus on functional group identification including hydrocarbons, organic halide, alcohols, ethers, ketones, aldehydes, amines, carboxylic acids, esters and other acid derivatives, carbohydrates, lipids and proteins are also surveyed.

Enrollment Requirement: Prerequisite: CHEM 102

This course is the first part of a two semester organic chemistry course sequence. Students are introduced to organic molecular structures, bonding, nomenclature including conformational analysis, potential energy plots, hybridization, stereochemistry and functional group chemistry, with emphasis on reactions and reaction mechanisms. It also includes the applications of instrumental methods in functional group analysis and identification of molecular structures. In the laboratory students learn the essential skills and techniques of preparation, isolation, purification, and analysis of organic compounds by employing standard and modern instrumental methods. This course also emphasizes the use and interpretation of Nuclear Magnetic Resonance (NMR), Infrared (IR) Spectroscopy and Gas Chromatography (GC) in the analysis and identification of organic compounds. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

Enrollment Requirement: Prerequisite: ENGL C1000 (formerly ENGLISH 101) or ENGLISH 101X or ENGLISH 101Y or ENGLISH 101Z or E.S.L. 110

This course encourages students to read literature from the perspective of filmmakers whose intent is to adapt it for the screen, as well as filmmakers who have an artistic vision or a story to explore as an original screenplay. By so doing, students hone their close reading skills on written and cinematic texts. They compare and contrast the elements of literature in both genres; including theme (ideology), story (plot), narration (narratology), point of view, characterization, dialogue, setting, scene descriptions (mise en scene, imagery, symbolism, tone) and editing. The first half of the course focuses on literature 'and' film, the second on film 'as' literature.

VOC ED 801CE- Non-Traditional Leadership (Repeatable) - 0 Unit

Non-traditional leadership is a social change metaphor intended to draw attention to individuals whose leadership skills emerge from cultural, social, and political conditions that shape their community. Non-traditional leaders are the unsung stakeholders who are distinguished by their intuitive knowledge of how to get things done, their influence with others, their ability to cultivate new relationships, and their refusal to give up on their community. They are community connectors working below the grassroots; driven by enormous hearts and gifts to bring people together to actualize a community enhancement vision. This course is designed to increase the capacity of non-traditional leaders to make a difference in their community by enabling them to identify common values, strengths, hidden assets, existing resources and leadership formations below the grassroots; so that they may design a common vision and take strategic action to enhance their community using the opportunities of the civic process.

VOC ED 806CE- Program Design and Evaluation (Repeatable) - 0 Unit

Many community-based organizations struggle to measure the impact of their programs and services. However, stakeholders and funders expect evidence of impact and the value of their donations and investments. Strategic program design and evaluation can build the capacity of a community-based organization to achieve its desired goals. This course introduces logic models for planning programs with the end in mind while tracking logistics and success along the way. Students will become familiar with how to describe a community service program and evaluation results in the context of the public health model.

VOC ED 807CE- Fundraising and Resource Development (Repeatable) - 0 Unit

Clear and powerful storytelling can shape the way others choose to contribute their money and resources to a community-cause. When non-traditional community leaders understand the interplay between their story, their role in the fundraising landscape, and the manner in which to present community projects that considers the expectations of funders, the chances of acquiring desired resources increase. Students will develop a philanthropic autobiography statement that guides how to navigate the world of fundraising. The course will introduce how to identify grant funding resources, developing donors, basic grant writing, and other approaches to empower non-traditional leaders and community-based organizations to sustain their work to improve social conditions.
