

HOLOCAUST REMEMBRANCE DAY

When the concept of the holocaust comes to mind, an array of grey pictures and grimly recounting of shocking events usually follows. During those 12 terrorizing and inhumane years Hitler managed to take the lives of 6,000,000 Jews, and in addition, an estimating total sum of 11,000,000 individuals who's differences were recognized as inferior towards the infamous operation "The Final Solution". These included Soviet soldiers (who were captives), political opponents who were in clear oppositions to Hitler's position of power, gays and lesbians (especially transgender), those with learning disabilities, and any other unstable character that sufficiently promised hindrance on the Nazi's conquest towards their dreamed up Utopia.

Let us not forget those who've lost their lives .
