

LA Mission College Career Center

CLOUD COMPUTING

MAJOR SHEETS

SKILLS

(things you will learn or use)

- Analyze data
- Embed intelligence
- Stream audio and video
- Deliver software on demand
- Test and build applications
- Create cloud-native applications

INTEREST

- Measurement and analysis
- Industry and vendor cloud certifications
- Multi-cloud environment
- Cloud technologies
- Intelligent models for data

WHAT IS CLOUD COMPUTING?

You're probably using cloud computing right now, even if you don't realize it. Simply put, cloud computing is the delivery of computing services including servers, storage, databases, networking, software, analytics, and intelligence over the Internet ("the cloud") to offer faster innovation, flexible resources, and economies of scale. You typically pay only for cloud services you use, helping you lower your operating costs, run your infrastructure more efficiently, and scale as your business needs change. If you use an online service to send email, edit documents, watch movies or TV, listen to music, play games, or store pictures and other files, it's likely that cloud computing is making it all possible behind the scenes.

LAMC DEGREES & CERTIFICATES OFFERED

- **Certificate of Achievement in Cloud Computing**

LA Mission College Career Center
