WHAT IS PSYCHOLOGY?

Psychology is the scientific study of the human mind and how its wide ranging function can influence behavior. Through scientific research and observation, it seeks to understand aspects of human life such as emotion, personality, memory, perception, cognition (learning), attention, motivation, biological processes and more. As a professional field, psychology aims to improve mental health and overall wellness. With advanced training in psychology, you can choose to work in scientific research, neuroscience, clinical practice, or as a consultant in large corporations, hospitals or government agencies.
