- Data analysis
- Following a set of procedures and routines
- Working with data and details
- Working on projects
- Creating projects

WHAT IS ACCOUNTING?

Accounting is the process of recording financial transactions that pertain to a business.

Accountants are responsible for determining an organization's overall wealth, profitability, and liquidity. Individuals identify, measure, analyze, and report these transactions to other agencies, regulators, and tax collection entities. Accounting is necessary for decision making, cost planning, and measurement of economic performance for any business. This degree provides a foundation for careers in business-related fields such as management, marketing, banking and finance, and law.
