icon to see their general comments. However, if your professor has left specific comments within your submitted file, you will not see those here.

3. To see specific comments within your submitted file, click on the assignment name.

4. A new window will open within Canvas called “Submission Details.” On the right side, you will see a Word file that you need to download because your professor has left comments within this Word file. (Do not confuse this with your original file you submitted which is on the left. If you do not see this additional Word file to the right, then your professor did not leave specific comments.) Click on this word file on the right, and it will download to the downloads folder in your computer.

5. Once you download and open the Word file, you should see comments from the professor in the left side margin. When you click on each comment, it will highlight a section on the paper that the professor is referring to.

Or, are you saying that Reeves has become a successful actor and Winters has not? If so, I would simply say this. Thanks. User This is not singular possessive; it’s plural: dads. User This plot summary needs more detail. What do you mean by potential? In business? Acting? School? User This should be broken into two sentences. User The review does a lot of naming of characters and the actors who play them. Where is the analysis? Was it funny? Why? How is it different, other than the daughters, than the original. Why do you like it?
