## **AFRO AM 019-Introduction to African American Studies (UC/CSU) - 3 Units**

*Requirement Designation: Meets Cal-GETC-6*

This ethnic studies course introduces students to the field of African American studies. It investigates how African American studies came to be a discipline of study and the shapes it took in its initial formations. Students explore the ways that various community members, activists, students, teachers, scholars, artists, musicians, poets, and filmmakers have contributed to thinking about Black experiences both historically and contemporarily. Finally, students consider current Black struggles for freedom, for justice, and for humanity through an ethnic studies lens.

## ART 708-Introduction to Ceramics (UC/CSU) - 3 Units

**Enrollment Requirement:**Art - Ceramics Course Family

Students in this beginning course learn the basic methods of creating ceramics that include basic design principles. Hand building techniques introduced in this course include slab, coil and pinch methods of construction and ceramic terminology. The emphasis will be drawn to the technical understanding of the behavior of clay and glazes. The course covers aesthetics and creative development of clay objects examining historical, contemporary, and personal modes of expression across cultures. ## ART 709-Ceramics I (UC/CSU) - 3 Units

**Enrollment Requirement:**Maximum of four enrollments in the Art-Ceramics course family.

This course provides continuation of introduction to ceramics. The emphasis of this course is learning to form vessels on the throwing wheel. The course material stresses further concepts of design. Art 709 curriculum has students investigate a more complex understanding of surface with glazing techniques, ceramic terminology, and clay and glaze chemistry. The course covers aesthetics and creative development of clay objects examining cultural, historical, contemporary, and personal modes of expression. Consult the catalog of local college for details.

## AVIATEK 012-Aircraft Metal Assembly Inspection and Evaluation Laboratory (CSU) - 2 Units

Instruction and practice is offered in cutting, bending, forming, welding, and fastening metal structures. Plastic enclosures honeycomb and composites are evaluated. Structural repairs using various fastening and bonding techniques are emphasized. Students will conduct a 100-hour inspection on an airframe using the appropriate reference material and correct procedures to determine airworthiness. Students perform General and Airframe practical projects.

## AVIATEK 325-Aviation Data Communications (CSU) - 3 Units

The student will study the techniques for sending and receiving information through space. Topics include media characteristics, modulation and demodulation, signal conversions, multiplexing and demultiplexing, protocols, industry standards, networks, and error detection and correction techniques. Circuits are modeled, constructed and tested.

## BIOTECH 104-Cell Culture Laboratory (CSU) - 1 Unit

This course provides an introduction to techniques for culturing cells, including media preparation, sterile technique, freezing, thawing, subculturing, and maintaining cells. Theory includes the selection of media, maintaining sterile conditions, and preventing contamination. Additional experience includes the proper use and care of equipment for culturing cells. Stem cell technology is also examined.

## BUSINESS

### BUS 001-Introduction To Business (UC/CSU) - 3 Units

Students engage in a multidisciplinary examination of how culture, society, economic systems, legal, international, political, financial institutions, and human behavior interact to affect a business organization's policy and practices within the U.S. and a global society. The course demonstrates how these influences impact the primary areas of business including: organizational structure and design, leadership, human resource management, risk management and insurance, organized labor practices, ethics and social responsibility, marketing, organizational communication, e-business/technology, entrepreneurship, legal, accounting, and financial practices, and the stock and securities market; and therefore how they affect a business's ability to achieve its organizational goals.

## CHEMISTRY

### CHEM 051-Fundamentals Of Chemistry I (UC/CSU) - 5 Units

*Requirement Designation: Meets Cal-GETC-5A or 5C*

Chemistry 51 is a descriptive course in general, organic and biological chemistry designed for nursing and Allied Health students. Topics include: the metric system of measurements, chemical symbols, formulas and nomenclature systems, chemical equations and physical and chemical characteristics for all states of matter. Other topics include acids, bases, buffers and pH. Organic topics focus on functional group identification including hydrocarbons, organic halide, alcohols, ethers, ketones, aldehydes, amines, carboxylic acids, esters and other acid derivatives, carbohydrates, lipids and proteins are also surveyed.

## CHEM 211-Organic Chemistry For Science Majors I (UC/CSU) - 5 Units

*Requirement Designation: Meets Cal-GETC-5A or 5C*

**Enrollment Requirement:** CHEM 102

This course is the first part of a two semester organic chemistry course sequence. Students are introduced to organic molecular structures, bonding, nomenclature including conformational analysis, potential energy plots, hybridization, stereochemistry and functional group chemistry, with emphasis on reactions and reaction mechanisms. It also includes the applications of instrumental methods in functional group analysis and identification of molecular structures. In the laboratory students learn the essential skills and techniques of preparation, isolation, purification, and analysis of organic compounds by employing standard and modern instrumental methods. This course also emphasizes the use and interpretation of Nuclear Magnetic Resonance (NMR), Infrared (IR) Spectroscopy and Gas Chromatography (GC) in the analysis and identification of organic compounds. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

## CHEM 212-Organic Chemistry For Science Majors II (UC/CSU) - 5 Units

*Requirement Designation: Meets Cal-GETC-5A or 5C*

**Enrollment Requirement:** CHEM 211

This course is a continuation of Chemistry 211 with emphasis on the remaining functional groups and aromaticity. Emphasis is put on reactions and reaction mechanisms, stereochemistry, multi-step synthesis of a variety of organic compounds such as aromatic compounds, alcohols, phenols, amines, heterocyclics, aldehydes, ketones, carboxylic acids and their derivatives. The structures, formation and reactions of enols and enolate anions are also studied. The structures and functional group reactions of biological molecules such as carbohydrates, amino acids, polypeptides, lipids and nucleic acids are discussed. The laboratory work presents more techniques of multi-step synthesis, isolation, purification, and analysis of organic compounds using conventional and modern instrumental methods. This course also emphasizes the use and interpretation of Nuclear Magnetic Resonance (NMR), Infrared (IR), Mass Spectroscopy (MS), Ultraviolet (UV), and Gas Chromatograph (GC) in the analysis and identification of organic compounds. The Chem. 211 and 212 sequence satisfy the one year organic chemistry requirement for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

## CHEM 221-Biochemistry For Science Majors (UC/CSU) - 5 Units

*Requirement Designation: Meets Cal-GETC-5A or 5C*

**Enrollment Requirement:** Prerequisite: CHEM 211

The course is designed to provide an introduction to the principles, concepts and terminology of biochemistry, with an emphasis on the structure and function of biomolecules, the role of intermediary metabolism in energy production and common biochemical laboratory techniques. Topics include the chemistry and properties of three groups of biological macromolecules (proteins, carbohydrates and lipids) and their building blocks, protein structure and function, enzyme catalysis, and the details of the central metabolic pathways (glycolysis, glycogenolysis, the citric acid cycle, electron transport, and oxidative phosphorylation) including their regulation and integration. Throughout the course the organizing principles of biochemistry and the distinctive characteristics of the living state will be emphasized. The laboratory exposes the students to a variety of biochemical techniques and how they are used to evaluate biomolecules and biochemical systems. These techniques include spectrophotometry, various types of chromatography, enzyme assays, protein purification and others.

## CIS 225-Enterprise Networking, Security, & Automation (CSU) - 3 Units

With a combination of lectures, individual and group labs, and simulations, students develop skills and knowledge needed to configure, secure, scale, and troubleshoot switched and routed internetworks. Students use technologies that include multi-area OSPF, Access Control Lists (ACLs), link aggregation, and LAN redundancy to create larger-scale internetworks. Students will also assess security threats and mitigation strategies. This course is the third course in the Cisco CCNA preparation program and is based upon the new requirements enforced in February 2020.

## CIS 229-Introduction To Cisco Network Fundamentals (CSU) - 3 Units

**Enrollment Requirement:**Advisory: CIS 210 and CIS 222

This course is equivalence to Semester I & II of the Cisco Network Academy. Part 1 of this course introduces the architecture, structure, functions, components, and models of the Internet and computer networks. The principles of IP addressing and fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of Part 1, students will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. Part 2 of this course describes the architecture, components, and operations of routers and switches in a small network. Students learn how to configure a router and a switch for basic functionality. By the end of Part II, students will be able to configure and troubleshoot routers and switches and resolve common issues with RIPv1, RIPv2, single-area and multi-area OSPF, virtual LANs, and inter-VLAN routing in both IPv4 and IPv6 networks. Students completing this course prepared to take the Cisco ICND1 and/or CCENT certification exam.

## EDUC 211-Introduction to Educational Issues (UC/CSU) - 3 Units

*Requirement Designation: Meets Cal-GETC-4*

This course serves as an introduction to the broad landscape of public education in the United States. It is applicable to students with interests in educational research, policy, or teaching in both formal and informal educational contexts. The course will provide context to answer the question, 'What is the purpose of public education?' Educators, students, parents, politicians, and community members may have varying answers to this question. Their respective answers have implications for how we organize schools as social and cultural institutions, how we think about teaching and learning, and how we determine the intended outcomes of education. Students will examine this question in relation to contemporary issues in the landscape of public education; understanding education and educational institutions in social, cultural, and historical contexts; and understanding the science of learning and human development in educational settings. The course readings highlight the work of educational researchers from UCLA's Department of Education, especially the ways their scholarship intersects with policy and practice. To complement the weekly reading and class discussion, students will work in groups to identify a real-life problem affecting public education in Los Angeles. Students will study this problem from multiple perspectives throughout the course. The final project involves conceptualizing a socially just solution to this real-life educational problem. Students will be required to conduct a minimum of three hours observing in a public preK-16 classroom setting.

## MATH 261-Calculus I (UC/CSU) - 5 Units

*Requirement Designation: Meets Cal-GETC-2*

**Enrollment Requirement:**MATH 260 OR Placement in MATH 260

Math 261 is the first in a series of three courses covering calculus. Students will investigate limits, continuity, differentiation and some integration of algebraic and transcendental functions. Students will explore applications of calculus include related rates, optimization of one-variable functions, calculation of areas, volumes, arc length and growth.

## MATH 270-Linear Algebra (UC/CSU) - 3 Units

*Requirement Designation: Meets Cal-GETC-2*

**Enrollment Requirement:**MATH 261 OR Placement in MATH 270

Math 270 develops the techniques and theory needed to solve and classify systems of linear equations. Solution techniques include row operations, Gaussian elimination, and matrix algebra. Investigates the properties of vectors in two and three dimensions, leading to the notion of an abstract vector space. Vector space and matrix theory are presented including topics such as inner products, norms, orthogonality, eigenvalues, eigenspaces, linear transformations, and diagonalization. Selected applications of linear algebra are included.

## MATH 275-Ordinary Differential Equations (UC/CSU) - 3 Units

*Requirement Designation: Meets Cal-GETC-2*

**Enrollment Requirement:**MATH 262 OR Placement in MATH 275

Math 275 provides the student with a basic understanding of the theory and content of ordinary differential equations. Various methods of solving these equations, especially first and second order, are emphasized as are solutions to physical applications problems. Other topics covered include existence and uniqueness theorems, systems of linear differential equations, numerical and graphical methods using computers, and the Laplace transform.
